HARDY TREES, SHRUBS, PLANTS AND BULBS

Fall - Spring
1946 - 1947

*Gardens of
The Blue Ridge*

E. C. ROBBINS, Nurseryman
ASHFORD, McDOWELL CO., N. C., U.S.A.

Western Union Telegraph and Long Distance Connection. Wire Orders When in a Hurry, to Avoid Delay.

NOTE TO CUSTOMERS

OUR LOCATION

Is in the heart of the Blue Ridge Mountains, "the most beautiful mountain region on the continent," in western North Carolina, nearly 4,000 feet above sea-level. My permanent headquarters is Ashford, McDowell County, North Carolina, on the scenic Clinchfield Railroad and U. S. Highway No. 221.

QUOTATIONS

This list cancels all previous offers. Do not order from old catalogues. Send for new copy. All offers of stock are made subject to conditions beyond my control

PACKING AND GRADING

Will be done in the most careful way. Orders will be packed to insure arrival in good condition. Shipments will be delivered to the local freight, express, or post office at prices named in this Catalogue. Packing will be charged at cost on charge orders. All shipments delivered at cost and risk of customer. Certificate of inspection attached to all shipments. We specialize in carload lots.

REMITTANCE OR REFERENCE

Should accompany orders from unknown correspondents. Discount of 5 per cent on cash orders amounting to \$5.00 and over only. All bills due and payable 30 days from date of invoice. Interest charged after 30 days.

SHIPPING INSTRUCTIONS

Should always be given fully, unless you prefer to leave to our best judgment. In this we assume no risk, our responsibility ceasing upon receipt of signed bill of lading by forwarders. All Claims for damages in transit must be handled by consignee.

CLAIMS

All claims for errors must be reported upon receipt of goods and will be rectified promptly. Unless this is done we cannot accept responsibility of any kind.

No GUARANTEE is made that stock will grow, whether planted by us or not. As we have no control over after-treatment or weather conditions, the purchaser must assume all risks after stock leaves our Nursery in good condition.

In no case shall we be held for damage exceeding original purchase price and only to this extent when proper proof is furnished that stock has been wrongly labeled.

All orders are accepted and filled on these terms, unless otherwise agreed.

FALL PLANTING SEASON begins in August and extends usually till about December 1, according to weather conditions.

SPRING SHIPMENTS are forwarded according to customers' wishes and subject to conditions beyond our control, March 1 to May 15. PLEASE ORDER EARLY.

Price List for Fall & Spring 1946-47

Hardy Native Herbaceous Perennials

This list contains a variety of Herbaceous plants furnishing a succession of bloom from early spring to late autumn, all having been tried out with success in cultivation. The height indicates the approximate height of each plant as found in wild state. The time of blooming naturally depends on locality.

NOTE: "DECIDUOUS" indicates that tops die down annually. "EVERGREEN" remaining green the year round. Both represent Perennials, lasting many years.

ORCHIS spectabilis. Showy Orchid. Deciduous. 6 to 12 inches. Leaves at base of stem ovate dark glossy green. Flowers violet purple, mixed with lighter purple and white. May and June. Shade loving....	.25	.22	.20	.18

Hardy Native Ferns

For shady locations, no class of plants can equal the Ferns. They are easily grown in ordinary soils and will often thrive where it is impossible to make flowering plants succeed. We handle large quantities of Ferns annually and recommend the following:

	PRICE EACH			OVER
	1-9	10-24	25-250	250
ADIANTUM pedatum. Maidenhair Fern. Deciduous. 12- 18 ins. One of the most distinct and beautiful ferns. Prefers moist shady location. Strong clumpy plants	\$.20	\$.17	\$.15	\$.12
ASPLENIUM platyneuron. Ebony Spleenwort. Evergreen. 6-8 ins. Leaves narrow. Naturally grows on cliffs and rocky soil. Semi-shade. Strong plants.....	.32	.30	.28	.26
ASPLENIUM trichomanes. Maidenhair Spleenwort. Ever- green. Small delicate. Naturally grows among rocks and cliffs. Semi-shade. Strong plants.....	.30	.26	.24	.22
ATHYRIUM filixfemina. Lady Fern. Deciduous. 1-3 ft. Exceedingly showy and vigorous. Shady location. X heavy clumpy plants.....	.22	.18	.16	.14
BOTRYCHIUM virginianum. Rattlesnake Fern. Decidu- ous. 6-12 ins. Triangular fronds. Deeply cut. Strong plants.....	.20	.17	.15	.13
CAMPTOSORUS rhizophyllus. Walking Fern. Evergreen. Leaves 4-12 ins. long. Heart-shaped at base. Its manner of growth suggests steps. Prefers dry shaded rocks. Strong plants.....	.36	.34	.32	
CYSTOPTERIS bulbifera. Berry Bladderfern. Deciduous. 1-2 ft. Finely divided rather weak stems. Tiny bulblets along underside of fronds. Shade or semi. Good for rockery. Strong plants.....	.26	.24	.22	
DICKSONIA punctilobula. Hayscented Fern. Deciduous. 1½-3 ft. Very handsome vigorous growing species. Recommended for shade or open locations. Widely distributed. XX heavy clumps.....	.22	.18	.15	.13
DRYOPTERIS filix-mas. Male Fern. Almost evergreen. 9-18 ins. Fine effects when massed. Shade. Strong plants.....	.30	.25	.22	

HARDY NATIVE FERNS, continued

	PRICE EACH				OVER
	1-9	10-24	25-250	250

Hardy Native Deciduous Trees and Shrubs

Cultural Directions for Azaleas, Broad-leaved Evergreens, and Similar Plants

Azaleas, Kalmias, Leucothoe, Pieris and Rhododendrons are acid-soil plants and will not succeed well in limestone soils. A deep, porous soil is essential. The ground should be excavated to a depth of about 2 feet, working in leaf-mold, humus, or well-rotted stable manure. This mixture must be worked in carefully and packed tight around the roots. Fill in the excavation with rotted sods, muck or peat soil, mixed with a small quantity of sand.

The plants should be set the same depth as in the nursery, which is shown by the earth-line near the base. After planting, mulch with several inches of leaves or light litter, allowing this mulch to remain around the plants, and renew it annually in the autumn. A thin covering of rich soil may be used to advantage in holding mulch in place and to assist in the decomposition. The mulch also tends to keep the soil cool in summer and protects against freezing in winter. If these simple instructions are observed, your planting of Broad-leaved Evergreens will be entirely successful.

For use in beds of Rhododendrons, Azaleas, and other similar plants we recommend the following: Galax, Shortia, Ferns, Orchids, Lilies, Trilliums, Cimifugas, Iris; Polygonatums; Sanguinarias, and most of our other perennials.

ACER dasycarpum. Silver Maple. Deciduous. 65-100 ft. Rapid growing. Leaves silvery white underneath. Flowers greenish yellow. Sun or shade. 5-6 ft.....	\$1.00	\$.90	\$.85	\$

Leaf-Mold — Nature's Plant-Food

This is the food nature provides for Azaleas, Rhododendrons, Kalmias, Leucothoe, Andromedas, Hemlocks, Pines, Ferns, Lilies, Trilliums, Native Orchids, and Perennials. Leaf-Mold gives the proper acid elements to the soil, insuring the best root-systems, foliage, and flowers. Valuable for old or new lawns. Leaf-Mold is collected from old Rhododendron beds, without artificial or chemical treatment.
